

Advanced Pedestrian Guidance System - Part# GZ2125

The new Advanced Pedestrian Guidance System is a portable, robust public guidance solution to prevent pedestrian or vehicle access to a potentially dangerous area.

APG is equally suitable in any industrial or construction environment where simple, fast deployment of a very long barrier is required. Simply position and extend APG in one direction to form a strong, highly visible safety barrier. The caddy posts can be positioned to create a barrier of any shape (U, square, right angles). The patented Tensabarrier ® retractable belt cassette enables a fast setup and take down.

Specifications:

- * Footprint: 40.55" x 30.31"
- * Height: 3'5"
- * Individual Weight Post: 26.45 lbs
- * Trolley with 4 posts: 150 lbs.
- * Ribbon colors: yellow/magenta, yellow/black, other colors available

Features and Benefits:

- * Single direction deployment for fast and efficient set up.
- * 4 caddy's can extend up to 105 ft (32 meters).
- * Large diameter wheels make the unit easy to move and maneuver with locking wheels for added stability
- * Trolley and caddy system is compact and easy to store
- * Robust steel frame delivers durability in harsh environments
- * Chemical resistant and hard wearing rubber wheels and hand-grips.
- * Cost effective way to manage pedestrian movement while maximizing customer satisfaction
